

**The UK's No.1 mapping site  
for professionals**

 **Promap**<sup>®</sup>  
A Landmark service

Promap is the market leading map provider to the property and environmental professional with over 26,000 users including surveyors, architects, environmental consultants, planners and civil engineers. Free to register, with no annual fees, Promap uniquely offers you online access to Ordnance Survey large and small scale current and historical mapping, current and historical aerial photography and an environmental risk screening tool, EnviroScreen.

### Key features

- View, print or export Ordnance Survey maps instantly
- Free drawing and customisation options
- Gain precise area and distance measurements onscreen
- Access to six layers of current mapping with scales ranging from 1:1,250 to 1:5,000,000
- DXF/GML exports from £14
- Choice of export data – Land-Line<sup>®</sup> and MasterMap<sup>®</sup>

### Applications

- Accurate site measurements and location plans
- Identification of man-made/natural physical features
- Planning applications
- Development opportunities and appraisals
- Project planning, design and reporting

## Aerial Photography

Promap has brought together the UK's three leading aerial photography suppliers to provide Promap users with the most comprehensive range of modern and historical photographs starting from £7.

### Modern

- Select the photo by price, quality, availability and currency
- Free drawing and customisation tools
- 12.5cm or 25cm resolution

### Historical

- Photographs taken by the Luftwaffe, RAF and USAAF between 1939 and 1954
- Available for major UK cities
- 50cm resolution (some 12.5cm and 25cm)

## Historical Maps

The UK's most extensive digital historical map archive provided by Landmark Information Group consists of over 1 million maps dating back to the 1840's.

- Download one off A3 prints starting from £10
- Maps available as PDF files covering 1km<sup>2</sup>
- Maps provided at 1:10,560, 1:10,000, 1:2,500 and 1:1,250 survey scales

## EnviroScreen

EnviroScreen is an online environmental risk screening tool delivering a unique, cost effective and straightforward approach for identifying the potential for contamination and environmental issues.

EnviroScreen instantly identifies potentially contaminative sites, within 100m of the site boundary and then reports the information online in real time, with an Overview Report.
