

Geology & Mining

Why do you need Geology and Mining?

Understanding geology and mining is vital when determining the stability and value of land and property and is essential for you when engaging in Contaminated Land Appraisals, Ground Investigations, Remediation Planning or Foundation Design. Information contained within Envirocheck's Geology and Mining reports is principally sourced from the British Geological Survey, The Coal Authority and Landmark's own database.

Product Features

Geology Maps 1:10,000/1:50,000 scales

Geological mapping from the British Geological Survey for the whole of Great Britain.

Coal Authority Coal and Brine Report

The report comments on past, current and future underground and surface coal mining activity, shafts and adits, coal mining geology, subsidence damage claims, gas emissions, emergency call-out surface hazard incidents, working rights and, in England and Wales, brine subsidence claim information from the Cheshire Brine Board.

Mining and Ground Stability Report

An accurate picture of ground stability issues surrounding a site. Exclusive to Landmark, this report contains mapping and data from a variety of sources, including MotionMap data from satellite mapping specialists Fugro NPA.

Soils Report

Produced by Cranfield University's National Soil Resources Institute, the Soils Report identifies and describes the properties and capacities of the soil at a specified location as recorded in the National Soil Map for England and Wales.

Benefits

- **Fast** – Instant access to geological data.
- **Accurate** – Site-specific geological, mining and soils information on and surrounding your site.
- **Comprehensive** – Available for the whole of Great Britain.
- **Reliable** – Quality controlled data from reliable sources.
- **Cost effective** – Saves time and resource collecting disparate data, allowing more time for analysis and reporting.
- **Informed** – Gain in-depth knowledge of your site prior to a site visit, enabling more informed decisions.

Applications

- Environmental Due Diligence work
- Environmental Impact Assessment
- Civil Engineering projects
- Insurance claims management processes

How to order?

To order Geology and Mining Information or to find out more information on any of our products and services, please visit www.envirocheck.co.uk. If Envirocheck does not provide what you need, please contact your dedicated Account Manager or call Customer Services on **0844 844 9952** to discuss a bespoke solution for your business.
